

EMPLOYMENT OPPORTUNITY

Yale ITS Wolson Early Career Development Program in Information Technology

The Brian J. Wolson Early Career Development Program (ECDP), hosted by Yale University's Information Technology Services (ITS), is for recent or soon-to-be college graduates interested in careers in an IT organization.

The Wolson program offers participants opportunities to have a direct impact on technology at Yale by contributing to development and support of Yale University's IT services. Learn about technology trends in higher education and gain new skills while working on ITS projects in partnership with staff, faculty, and students.

The 18-month program consists of three rotations in areas within Yale ITS that align with the participants' interests. Visit the ECDP website for descriptions of past rotations. **Participants are paid and eligible for Yale benefits.**

2015-17 Wolson Program Information

Qualifications: A bachelor's degree, awarded no earlier than the 2013 calendar year. Current students accepted into the program must earn their degrees before the program begins. All degree programs accepted; computer science, business, and IT-related degrees preferred. Knowledge and experience in information technology preferred.

Application Deadline: June 1, 2015

Program Timeline:

- January 2015 - Online application opens
- March through June 2015 - Selected applicants invited to interview
- June 1, 2015 - Last day to apply
- June 2015 - Selected applicants receive offers
- August 2015 – Program begins
- February 2017 – Program ends
